CPQCC MEMBERSHIP LETTER: NSI04 – 05-2012

TO: CPQCC PARTICIPANTS

FROM: CPQCC DATA CENTER

SUBJECT: CPQCC NETWORK SYSTEM INFORMATION: NEW OSHPD ID CODES FOR SATELLITE NICUS

DATE: MAY 4, 2012

CC: CPQCC STAFF

May 4, 2012

Dear CPQCC Participants,

Starting in May 2012, we are replacing the OSHPD codes for all Satellite NICUs with "fake" OSHPD IDs in the 2012 CPQCC Manual of Definitions.

These IDs were generated and implemented by the CPQCC Data Center, as most Satellite NICUs do not have a separate OSHPD ID that is different from the main NICU. Note that we currently use "fake" IDs for military hospitals, birthing centers that do not report to OSHPD and non-hospital or out-of-state hospital locations as well.

This is simply a cosmetic change in the on-line form and **will most likely ONLY affect our electronic data submitters and those of you who pull your center's raw data from the www.cpqccdata.org site.** The "fake" OSHPD IDs will help to distinguish the difference between the codes for co-located hospitals and satellite NICUs when entering the transfer location (Item 59) in the Admission/Discharge form. However, ONLY the OSHPD ID code will change, the Satellite NICU hospital name will remain the same.

The OSHPD code list (Appendix F) has been updated in the 2012 CPQCC Manual of Definitions and can be downloaded from the following link.
http://cpqcc.org/data/cpqcc_downloads

Please use the following codes for the Satellite NICUs without an OSHPD code:

750001 CHCC at St. Agnes
750002 LPCH at Sequoia
750003 LPCH at Washington
750004 Rady's CHSD at Scripps Encinitas
750005 Rady's CHSD at La Jolla
750006 Rady's CHSD at Palomar MC

Please refer to the updated Satellite NICU Systems Upgrade Tip Sheet. Please contact us at support@cpqcc.org if you have any questions.

Thank you,

CPQCC Data Center
