

**2022 CCS
LAINA
Requirement**

2022 CCS LAINA REQUIREMENT

What Does It All Mean?

- **LAINA** data reporting begins with birth year **2022**
- **Lower Acuity Inborn NICU Admissions (LAINA):**
 - Lower acuity (**not** VLBW's, **not** high-acuity “Big Babies”).
 - These are CPQCC ineligible infants.
 - Free standing children's hospitals without inborn admissions are not affected
- **CPQCC Option:** Data must be entered in the optional **All NICU Admits database.**
 - Please note that you must submit all NICU admissions (inborn and outborn)
 - Please disregard the “NICU Activity Log of the CCS Supplemental Form” statement mentioned in the CCS letter.
- **Reports:** Reports will be generated in the **All NICU Admits Focusboards.**
 - All NICU admissions will be included in this report (inborn and outborn)

What Are the Options?

Use CPQCC All NICU Admits Database

1. Enter all NICU admissions including LAINA data (NICU Data website)
2. Review all NICU admissions including LAINA reports in the All NICU Admits Focusboard (NICU Reports website)
3. CPQCC will report all NICU admissions including LAINA to CCS according to the new CCS requirement.

OR

If your site prefers not to use the All NICU Admits database, please:

1. Contact Dr. Schulman at Joseph.Schulman@dhcs.ca.gov
2. Follow his guidance on how to collect and report data.

ALL NICU ADMITS DATABASE

How to Access

1. All NICU Admits Database

- You already have access
- Log into www.cpqccdata.org
- Data can be entered/viewed by birth year or admission year
- Data can be uploaded via CSV file or entered online
- Data can pre-populate the CCS Supplemental Form (please see the CCS Tip Sheet)
- Data can propagate to CPQCC A/D/CPeTS form

All NICU Admits Focusboard

The All NICU Admits Focusboard was first released in January 2021. It was created in response to the need of generating a more complete picture of NICU care based on all NICU admissions.

The data for the All NICU Admits Focusboard come from 3 sources:

- The annual CCS form that captures aggregated counts of hospital births, NICU admissions by inborn/outborn status and birth weight or gestational age since 2006.
- The Optional All NICU Admits database that captures minimal data on individual NICU admissions since 2018.
- California Department of Public Health (CDPH) birth certificate data.
